

# Digital Research | Metadata Services Unit (MSU) quarterly report | July 1–Sept. 30, 2019

Updated MSU interactive dashboard **BETA**

**See the relationship between digital imaging and metadata!**

You can now explore the relationships between metadata creation, the addition of digital images to the repository, and metadata approvals on the MSU dashboard.

*Discover when related activities took place*

*View by research center or division*

*See the top collections associated with each data point*

Metadata quality and production statistics await your review at <https://nypl-metadata.shinyapps.io/dashboard/>

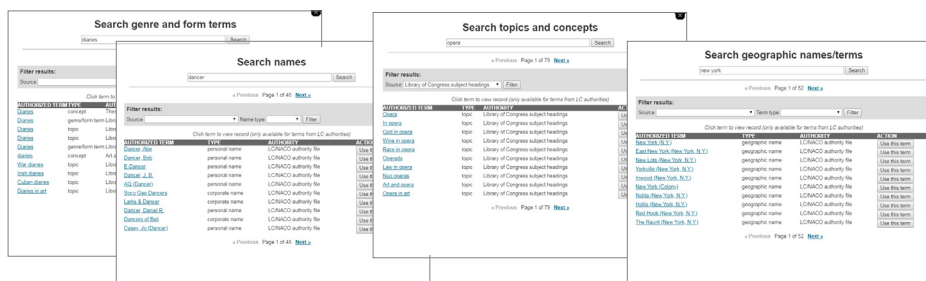

This project will continue to evolve based on your collective input. Thanks for your feedback!

Metadata Management System (MMS) improvements

**More than 1.5 million terms added to the MMS authorities module.**

The MMS authorities module facilitates metadata creator workflow by providing an in-application resource for adding controlled terms to metadata elements.

The module's content had not been updated since MMS launched in 2012. This update, made possible by the Digital repository team, has resulted in improved efficiency and accuracy, especially with AMI material.

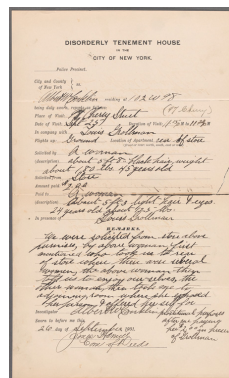

Collection highlights

Notable projects completed within the past quarter.

Committee of Fifteen

1,700+ items  
18,150+ captures

A report about solicitation at 97 Cherry Street, 1901

Music set & costume design

3,700+ items  
4,100+ captures

Stag costume for Schöpfung, by Richard Rychtarik, 1959
